7. LENGTH OF OBSERVATION 5 seconds		8. NUMBER OF OBJECTS one		9. COURSE NE	
10. BRIEF SUMMARY OF SIGHTING Oval shaped obj approximately 60 ft long. More blunt on one end. imilar to fluorescent light, but did not make a light on the surface of the ground. No trail. Observer states that he felt a gust of warm air at the object left the area with a swishing sound. Radio & lights on car went out & car engine stopped. As the car slowed down observer noticed a lighted object approx 200 yards to the left of the road hovering near the ground. Rose vertically in a NE direction.				11. COMMENTS Probably the result of an over active imagination. (Following the Sighting) Duration //only 5 secs. Obj has characteristics of Meteor except for being stationary & hovering. Also error in time since sighting bt night and 1545 not consistent. Evaluation probably meteor. Additional description considered as unreliable. <u>CONFLICTING DATA</u>
